

## KIDD Extractor Installation

KIDD Extractor Installation Instructions: Position the bolt on its side with the extractor side facing up. The rear of the bolt to the right of your working space. Slide the spring over the extension of the extractor plunger, then slide the spring end first into the extractor slot. Make sure the plunger spring combination is set firmly into the slot. By using a small tool, compress the plunger all the way back and hold it there. Place the extractor into the slot making sure the squared end is placed into the slot first with the hook facing down. Release the plunger to allow it to slide over the squared end of the extractor; this will hold it in place. Make sure the extractor has good movement and check for clearance on your bullet. The bullet should stay held in place with the extractor but also should have some wiggle room.
